MONEY, STOCKS AND GRAIN

A Fairly Steady Market at New York. with Unusually Small Fluctuations.

At Indianapolis Wheat Was Steady, Corn Quiet and Oats Firmer at Unchanged Prices-Quetations on General Produce.

MONEY AND STOCKS. Interest Centered in a Few Shares and the Fluctuations Were Very Small, At New York, yesterday, money on call

Was easy at 14 @2 per cent., the last loan being made at 2; closing offered at 2 per cent.

Prime mercantile paper, 34 @5 per cent. Sterling exchange was quiet but steady at \$4.8615 for sixty-day bills and \$4.87% tor demand.

The total sales of stocks were 220,486 chares, including the following: Atchison, 14,100; Chicago Gas, 19,085; Erie, 6,600; Hocking Valley, 10,843; Louisville & Nash-Ville, 4,818; Manhattan, 11,612; Northern Pacific, 34,240; Reading, 20,400; Richmond & West Point, 3,200; St. Paul, 8,250; Union Pavific, 3,910.

The stock market was still extremely narrow, notwithstanding the dealings extended to a large number of stocks, for the interest was centered in a few shares. which were affected by special causes. The opening was fairly steady, and prices immediately advanced in the absence of pressome of the industrials were stronger, and substantial gains were made in them, though the general weak told on their advance and a partial reaction occurred. The great feature of the late dealings was the renewal of the attack upon Northern Pacific preferred, and on largely increased business it fell away over per cent. The rest of the list followed and the close was quiet but weak at the lowest prices of the day. The final changes include losses of 1 per cent. in Rock Island. 1% in Northern Pacific preferred and 14 in Union Pacific. Hocking Valley is up 1%. Manhattan 1% and Cordage 1%. Ratiroad bonds were still active and in

the main firm, but there were signs of re-sizations in the list, and in the case of the Atchison incomes positive weakness developed in the late trading, and those bonds are I per cent, lower at 55%. The trading reached \$2,256,000, of which Atchison incomes furnished \$218,000. Government bonds were dull and steady. State bonds were dull and firm. Closing

About Whitewashing.

thitewashing, and often kalsomining to be done. In the city, where one can send for a professional worker, and put the whole business in his hands at a low price, the matter is easily attended to, but in the country districts this must be attended to by the housewife herself, or be done by the few unskillful hands in her employ, whose work will require her superintendence. The first thing to be done is to inspect the walls and see if they will bear another coat over the one which has already been put on. If the wall has been whitewashed, and has begun to chip off, it must be scraped before another coat is put on, and this is quite a serious undertaking. It means the removal of the old coats that have been put on the wall. We believe there are scrapers that come especially for this purpose. It is better to remove everything, furniture and all, out of the room to be scraped, as the fine dust of the old lime penetrates through everything. After the room has been thoroughly scraped the new whitewash can be applied, though it is best to fill in or mend any holes in the wall with plaster of paris, wet with paste or water. It seems to us that the very best and sweetest whitewash is made by mixing ordinary slack-lime in water, adding simply salt enough to make it cling to the wall and blueing enough to give it a pearl-white tint. Ordinary lanndry blueing will not do for this purpose. What is known as Mason's blueing is the very best to use, as it will go further and do better work and give better effect than anything else.

It is an easy matter to apply whitewash, and a good whitewash brush does not cost over 75 cents. It may be found in any country store. A kalsommer's brush is a more expensive article, and a satisfactory one may cost as much as \$2. A kalsomine wall which is to be rekalsomined should be washed. It is impossible to apply kalsomine to a wall that has been whitewashed. It would look streaked and queer. An ordinary rule for preparing kalsomine calls for ten pounds of zinc-white, mixed to a thick cream with warm water. half a pound of dissolved glue, all stirred together. The kalsomine must be applied while it is warm, adding a little hot water when it is too thick to spread easily. Old-

fashioned kalsominers always spread their

kalsomine on as painters usually spread their oil paint, evenly in one direction, row after row, and this is probably the easiest way for one to do who is not expert. It may be just as well for a beginner to use common whitening, which is less expensive than zine-white, and which is applied in exactly the same way. For side walls a bound of glue instead of half a pound should be used. This is necessary to prevent the whitening rubbing off on the hands and clothes when they are brought in contact with it. The extra amount of glue will prevent all trouble for a year or two, but as there is nothing that will prevent old kalsomine from rabbing off, it is always best to paper or paint the sides of a Where kalsomine is applied to a fresh plastered wall, it should be sized

with glue and a kalsomined wall which is

to be papered should be treated in the same

The trouble with Mr. Kipling is that he pegging away at a newspaper desk in receipts, 7,738 packages.

HELD DOWN BY THE ENEMY

As It Was, Chicago Wheat Climbed 5-8c, Which It Firmly Maintained.

1,750.00

Report that the Native Farmers in India Are Holding Back for Better Prices Helped the Weather Scare Do Its Work.

TRADING AT CHICAGO.

Opening Was Down, but the Steady Tone Finally Carried Up Prices. CHICAGO, May 12-The professional sellers and scalpers were against wheat all day until near the close, when they gave up the fight and turned to cover part of their short sales. Bullish news from England, France and India, and the stubborn strength of the May option locally, had much to do with the change of front. Compared with last night, May wheat this evening is %c up and July %c. Corn is %c higher; and oats, pork and ribs are practically unchanged. There was no 325.00 heavy trading to-day in any of the pits. The delivery last evening of 600,000 bushels of wheat, said to come from elevator 650.00 | people, was expected to depress the May price at least. Instead, May sold at lec to les premium over July. One explanation was that the wheat which the elevator men sent around was taken in by commission-houses which had previously bought it in the pit by orders from the same men who were sending it out, presumably for its effect upon the market. Deliveries this afternoon were not over 25,000 bushels. The opening was about 'sc under to the same as yesterday's closing. Prices advanced about 40%c, then declined 40%c, again advanced 4010 per bushel and ruled quite strong. The weather continues to have considerable effect on the market, if not the controlling influence. The higher prices at the start were due to the cold and unseasonable weather, and the subsequent decline was attributed to reports of clearing weather in the Northwest, and the later advance was helped along by strong continental cables and a report that the natives of India were storing their wheat on account of lower prices and unfavorable outlook for the crop. There was a fair demand for export at the sea-board, and 40½ loads reported taken at New York and other ports, and it was claimed that the purchases yesterday were larger than reported, than seventy-five loads at New York alone had been engaged. Rain was reported in the West and prospects of rain throughout control district. throughout central district to-morrow.

Betterweather was reported in the Northwest, and seeding progressing. Holders of corn at the opening were afraid of a slump in case of bright weather, and shorts were afraid of a bulge in case there were more rains reported. But the Price Current dispatch was circulated, saying the late rains had not as yet seriously prejudiced corn crop prospects. This caused some selling. The trade suspected Baldwin and Farnum of trying to work off some more of the New York line, and prices had quite a drop with wheat. On the break logan and other commission-houses had buying orders. Local operators who got short trying to start a break in July under 43c were quick to buy on a little rally, and there was a good recovery later. Wheat was higher at the same time and helped the

Oats, after opening up firm, weakened with the other cereals on fine weather reports, but eventually recovered. Provisions were extremely dull, and the fluctuations insignificant. Estimated receirts for to-morrow are: Wheat, 90 cars; corn, 215 cars; oats, 170 cars; hogs, 24,000 head. Freights were steady with a fair demand for boats at 2c for wheat and 13c for corn to Buffalo. The leading futures ranged as follows:

Millers Have Marked Up Prices, but Find it

Hard to Make Sales. MINNEAPOLIS, May 12-The Northwestern Miller says: "The mills ran more strongly last week. The week's output of flour was 184,150 barrels, averaging 30,691 barrels daily, against 178,450 barrels the previous week. Owing to improvements to the water power five milis of the medium class will probably be idle most of this week, cutting off about 6,000 barrels daily. while another mill of 3,000 barrels capacity has been started. It would appear that not to exceed 27,000 barrels daily will be made throughout the week, and even that figure may not be reached. Prices on patents have been marked up 10@15c per barrel during the week, but it is commonly stated that onyers all want flour at old quotations, and it is very difficult to effect sales on a much better basis. One miller complained to-day that flour sold as long ago as October and November had not been ordered out, he being unable to get shipping directions. The direct exports last week were exceptionally large, being 77,-900 barrels, against 64,670 barrels the preceding week.

TRADE IN GENERAL.

more, Cincinnati and Other Points.

tember, 7.36c; October, 7.46c; November, 7.56c; December, 7.66c; January, 7.78c; Feburary,

Dry Goods. NEW YORK. May 12.—The demand for dry goods was about on previous lines. It seemed a little more quiet, in accordance with usual fluctuations. The improving tendencies were manifested as lately noted: inquiry for goods and actual transactions widening out, if slowly. Cotton flannels and wool thannels were fairly cotton. There was some improvement in the recotton fiannels and wool flannels were fairly active. There was some improvement in the request for bleached cottons. Frints and dress cottons were quiet. Good orders were being placed for damacks, lace curtains, quilts and comfortables. The demand for underwear was quiet, but with the mills well supplied with initial work. Flat-fold cambries are sold some distance ahead. Print ciotus are firm. The tone of the general market was good.

A Drinking Fountain for Poultry. Farmers' Voice.

The best drinking fountain we ever used was made of a stone jug, in the following manner. With a sharpened nail we pierced a small hole in the side of the jng an inch and a half above the bottom. This can be done quite easily if a light hammer is used and the nail is lightly tapped. The hole should not be larger than a wheat straw. The jug is then filled with water, tightly corked and set in a basin with flaring sides, three inches deep. The bottom of the basin was of the same size as the bottom of the jug. When the jug is set in the basin the water in it will run out until it fills the basin to a level with the hole in the jug. and it will rise no higher. As the fowls drink the water will keep at the same level until the jug is emptied down to the level of the hole. This kind of a fountain keeps the water from getting befouled, and gives the fowls a good chance to drink. If it is set on a block six inches thick there is no danger of having filth thrown into it by scratching hens. We have used such a fountain for five years and find it the best one we ever saw; and any body can make it.

-THE-

DAILY, SUNDAY AND WEEKLY.

The Journal is first of all a newspaper. Its primary object is to publish the news, and to secure this it spares no pains or expense. Besides the service of two great news agencies, which cover foreign countries as well as the entire United States, it has a corps of Special Correspondents, who give attention to those events and occurrences that are likely to be of particular interest to the Indiana public. Its Washington bureau was established for the purpose of looking after matters in which the State and its people are concerned, and is under the management of an Indiana manwell acquainted with the local business. and political issues. It has a correspondent in every town of importance in the State, and is constantly increasing its facilities for obtaining inform tion from every quarter. Its staff of city reporters is large, and its local departments are unexcelled. As a news paper it is far better equipped than any other in the State, and welcomes comparison with its contemporaries in any and all of its departments. With all it endeavors to be accurate and trustworthy, printing the news, whatever it may be, without personal or partisan

But while the Journal is non-partisan as to news, it is a Republican paper, and sets forth Republican principles. It is important that the people shall read the truth about these principles, and it was with the object of putting everybody in the way of doing so that the price of the

DAILY JOURNAL

- Was reduced to -

A WEEK No other method of securing a Republican victory at the polls is so certain as the circulation of Republican papers

among voters. Since the reduction in the price thousands of subscriptions have poured in from all parts of the State, showing that a need was supplied. In order to have the proper influence and effect upon voters seeking for trustworthy information the Journal should go into their hands at once, and not next spring or summer. Clubs are being ever daily mails reach, and as rapidly as traveling agents can visit the places, but Republicans in each and every locality cannot do their party greater

service than to interest themselves in

circulating the Journal.

Is a paper that gives more attention to miscellaneous literature than the other editions, and contains in its sixteen, and often twenty, pages a variety of

CHOICE READING MATTER

That satisfies the most exacting taste.

The same reasons that call for the im mediate extension of the the daily circulation apply to the weekly. This is carefully edited, with a special view to the wants of Indiana readers, both in its general and political news. Its subscription price, \$1, with reduction to clubs, places it within the reach of all, and no campaign contribution can be so effective as when spent in furnishing this paper to readers who need Repub. lican doctrine.
